+Lên trang chủ Wordpress.Org để tải gói nguồn mở wordpress về

-Link download: <https://wordpress.org/download>

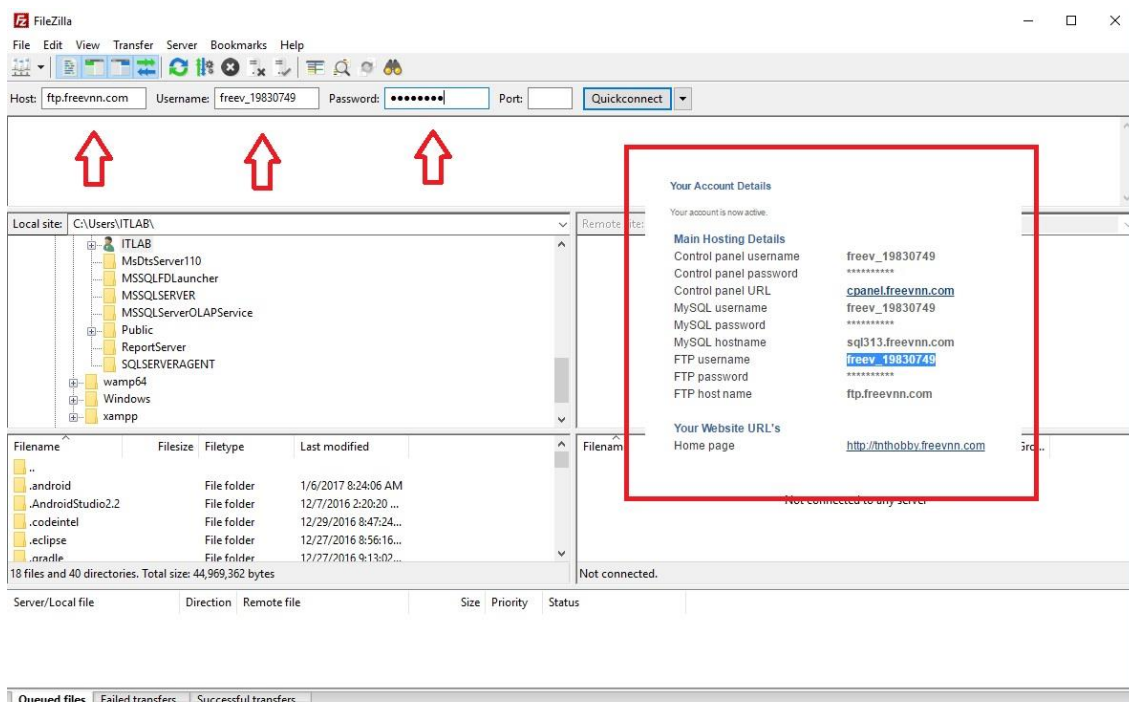

-Sau khi tải về giải nén file vừa tải ra.

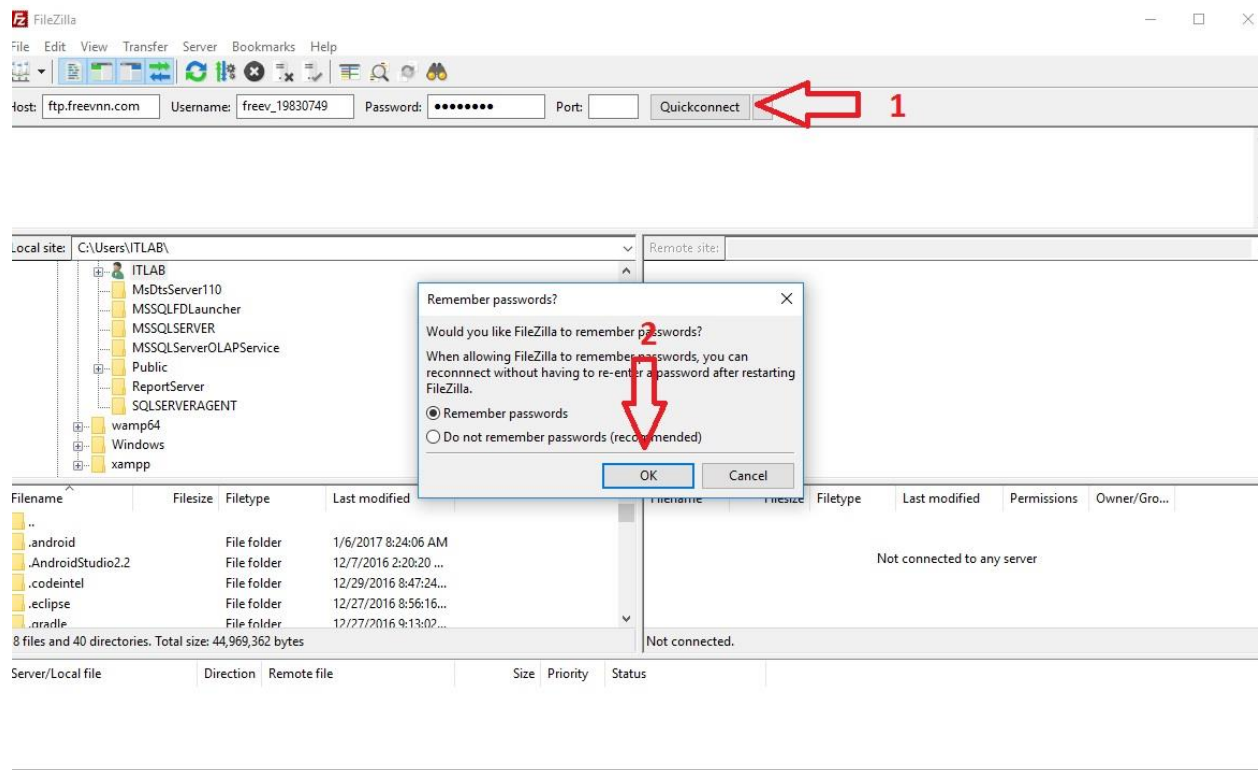

-Để đưa gói wordpress lên hosting cần tải phần mềm hỗ trợ đẩy gói đó lên vì cái này mình đăng ký host miễn phí nên nó hạn chế, mặc dù nhiều host trả phí cũng không đẩy trực tiếp từ trang cpanel được nên mình phải dùng cách thủ công này để đưa gói wordpress lên.

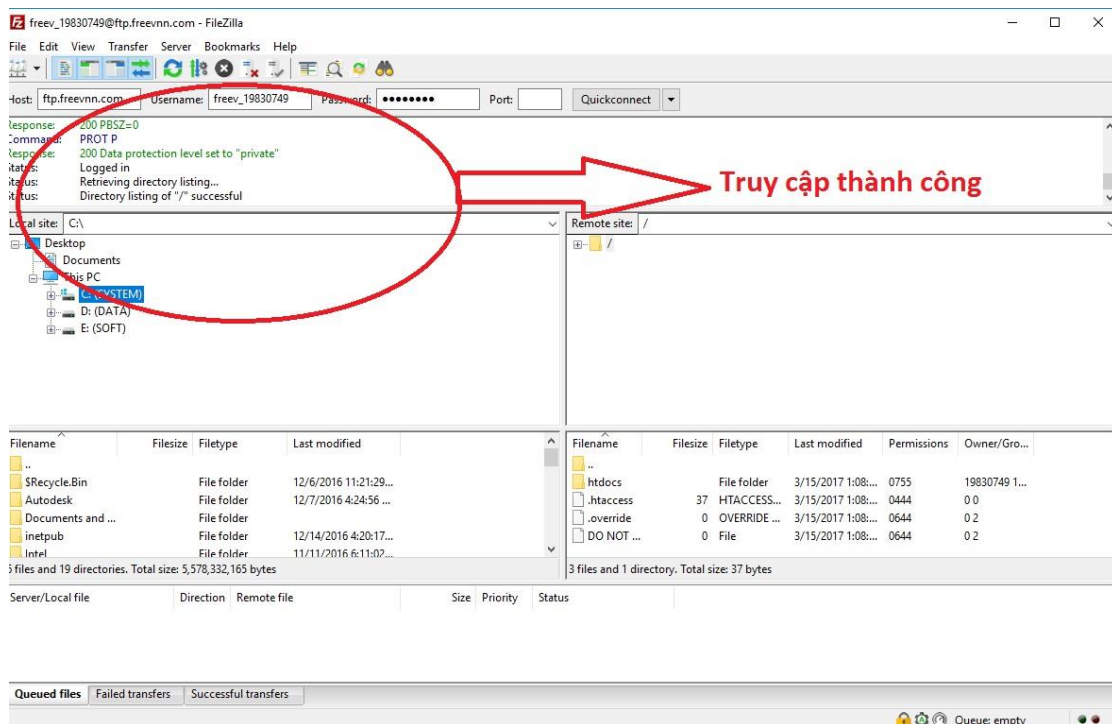

-Sau khi có phần mềm filezilla rồi, bạn mở lên và nhập đầy đủ thông tin username với password nhé!

-Các thông tin này mình đã nói cần lưu ý lúc đầu rồi giờ chỉ việc copy dán vô thôi.

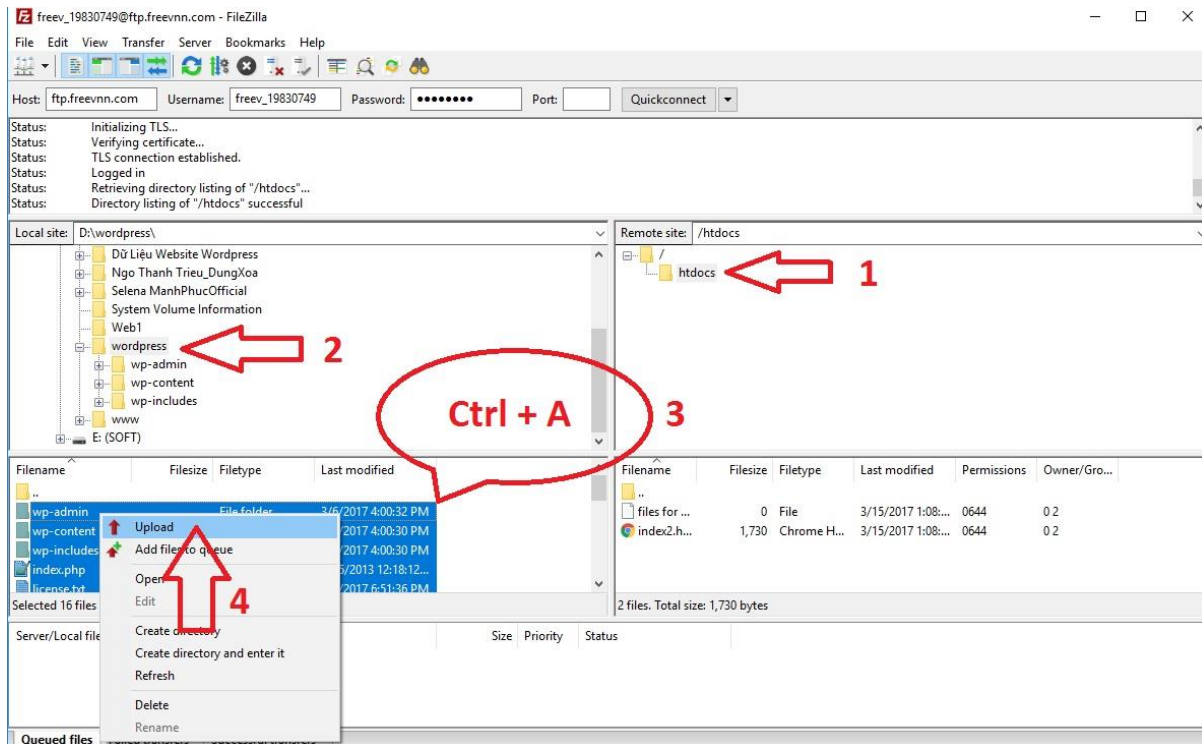

-Sau khi điền đầy đủ thông tin xong bấm vào QuickConnect rồi đợi nó chạy.

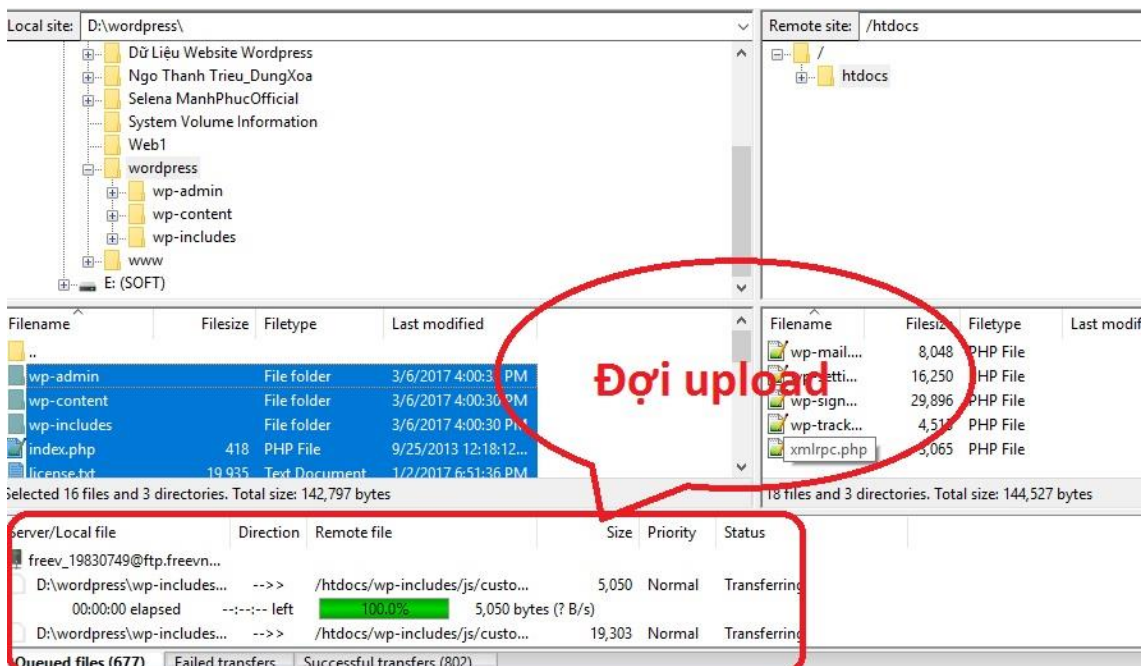

Successful nghĩa là thành công rồi đấy

Rồi bây giờ cần tải cái gói wordpress mình vừa giải nén ra đưa lên host nhé!

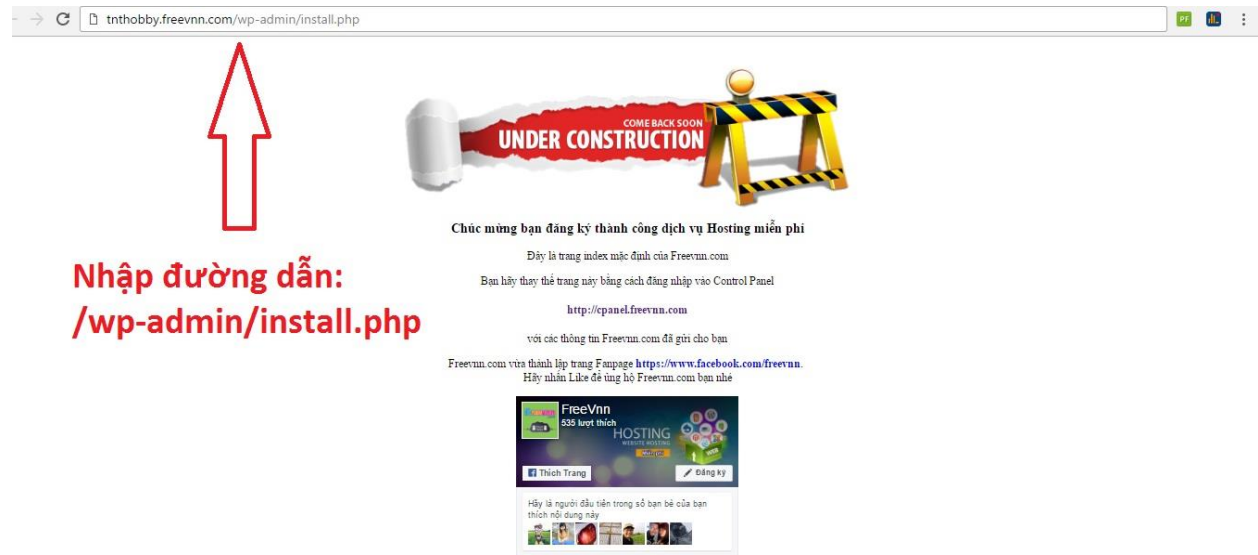

- Bước 1 : Chọn thư mục htdocs
- Bước 2: Chọn thư mục wordpress
- Bước 3: Chọn tất cả bằng Ctrl+A
- Bước 4: Chuột phải -> Chọn Upload

Đợi nó upload gói lên nhé!

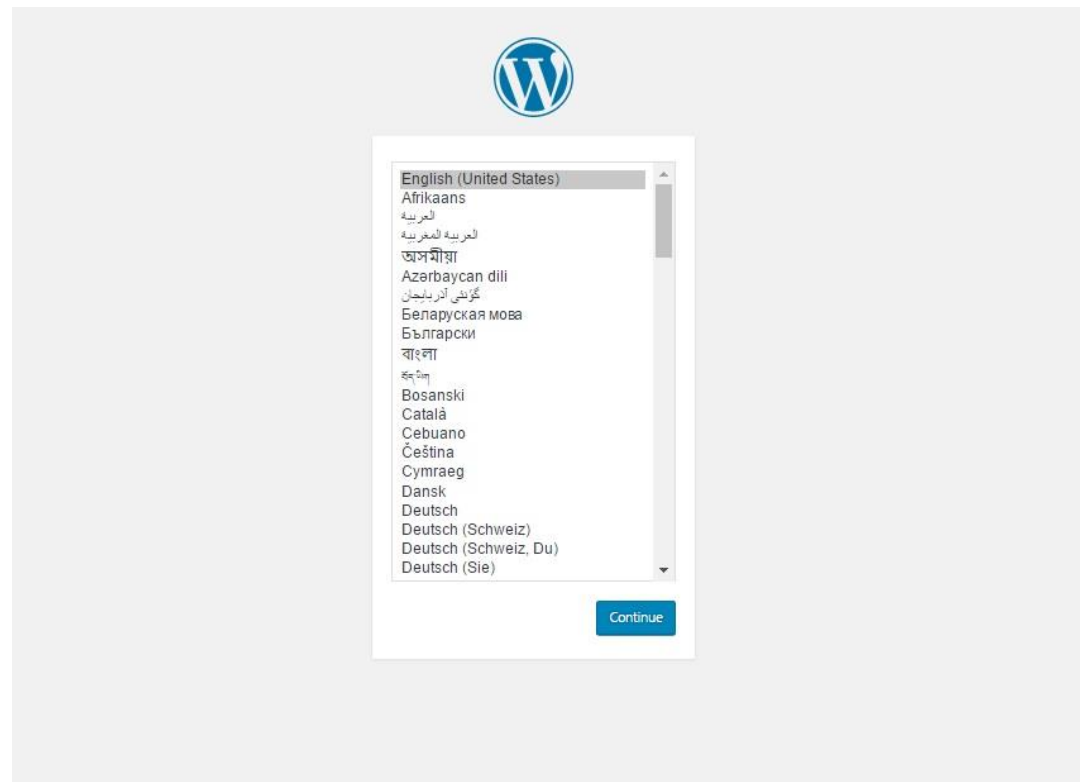

-Sau khi upload thành công bạn vô đường link tên miền bạn vừa đăng ký rồi thêm phần này sau đuôi link để truy cập vào trang rồi đăng ký wordpress nhé!

-Thêm phần này nhé! “wp-admin/install.php”

Bước 1:

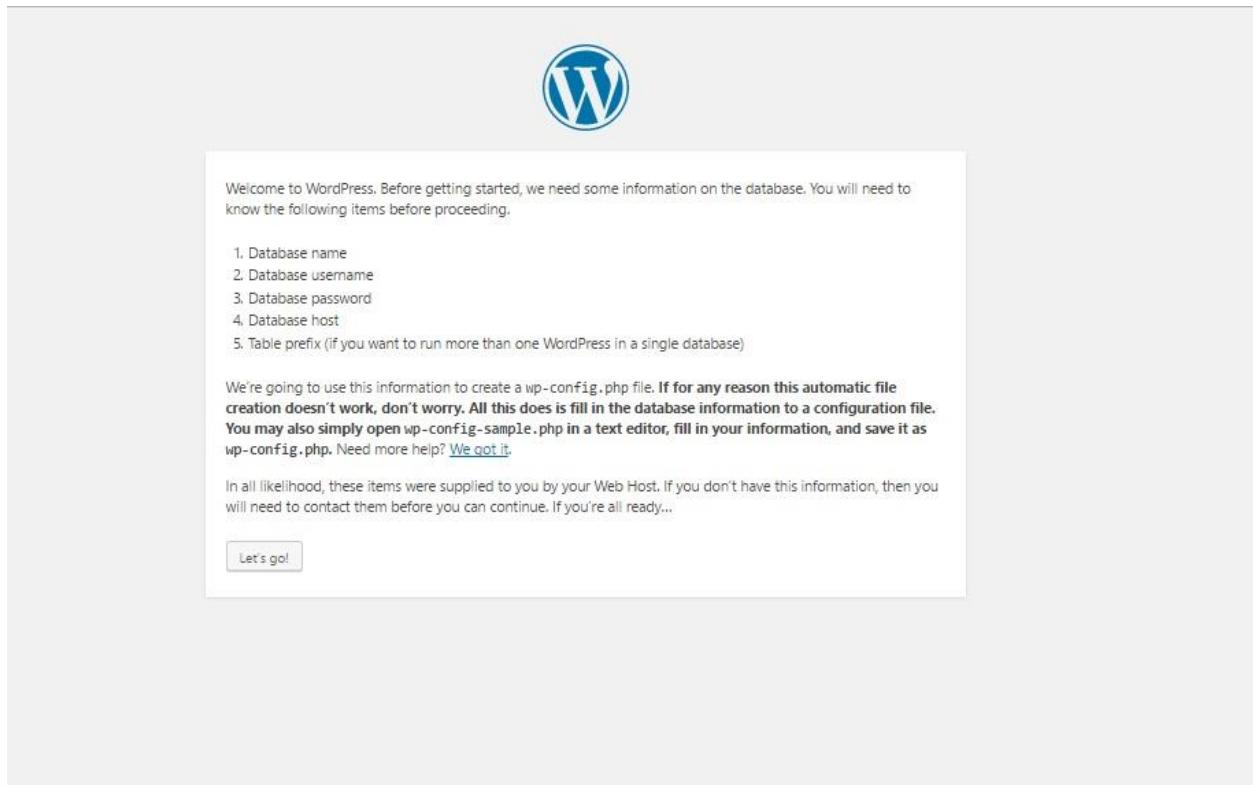

Sau khi vào link đó sẽ chuyển tới trang đăng ký Wordpress như hình dưới: Chọn ngôn ngữ muốn sử dụng.

- Chọn Continue.

Bước 2:

Tới bước này chọn Let's Go!

Welcome to WordPress. Before getting started, we need some information on the database. You will need to know the following items before proceeding.

1. Database name
2. Database username
3. Database password
4. Database host
5. Table prefix (if you want to run more than one WordPress in a single database)

We're going to use this information to create a wp-config.php file. **If for any reason this automatic file creation doesn't work, don't worry. All this does is fill in the database information to a configuration file. You may also simply open wp-config-sample.php in a text editor, fill in your information, and save it as wp-config.php.** Need more help? [We got it.](#)

In all likelihood, these items were supplied to you by your Web Host. If you don't have this information, then you will need to contact them before you can continue. If you're all ready...

Bước 3: Nhập các thông tin từ databass đã tạo.

WordPress logo

Below you should enter your database connection details. If you're not sure about these, contact your host.

Database Name **1** The name of the database you want to use with WordPress.

Username **2** Your database username.

Password **3. Nhập Pass của bạn.** Your database password.

Database Host **4** You should be able to get this info from your web host. If localhost doesn't work.

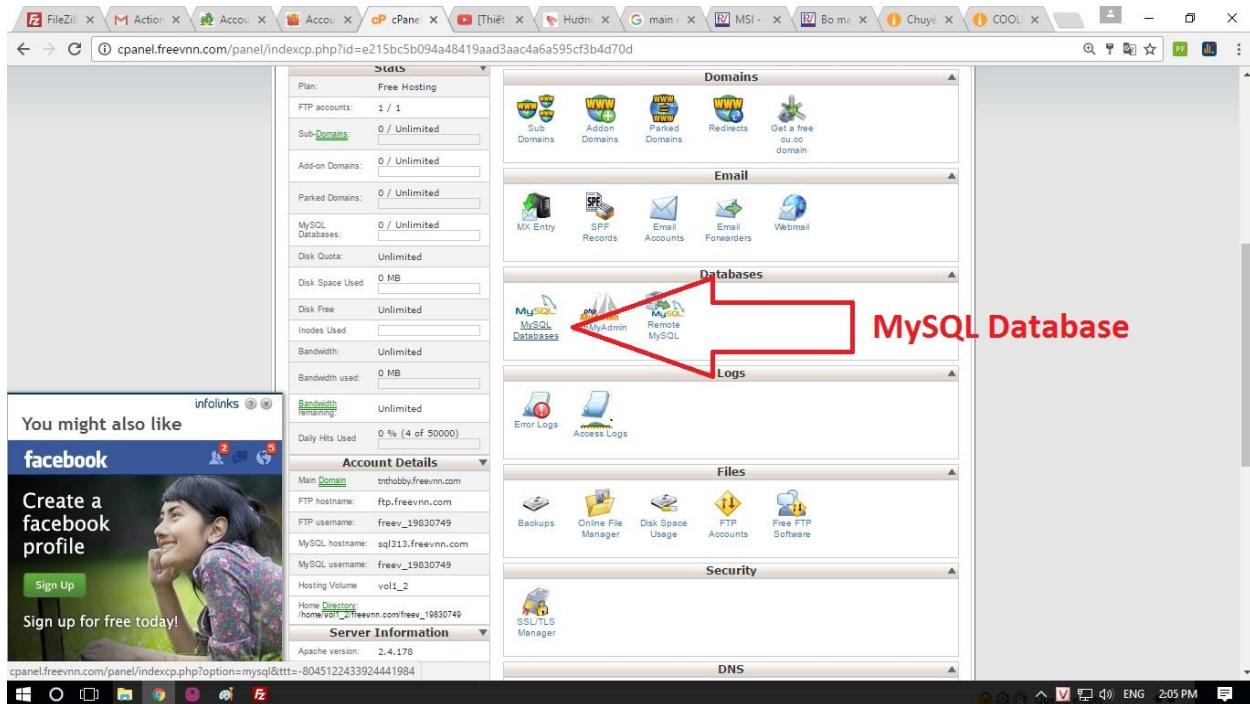

Table Prefix If you want to run multiple WordPress installations in a single database, change this.

Current Databases **2** **4**
